Seminar overview

Knowledge of Good Laboratory Practices is very important in Pharmaceutical industry. New GLP requirements as per Schedule L1 of Drug Rules will come into effect from 1st November 2010. Topics such as General laboratory requirements, instruments calibration, microbiological testing and internal audit will be covered during the day long deliberation.

This seminar provides an excellent opportunity to exchange ideas on topics of importance and also seek expert advice on current hot topics bothering the technical staff in day -today operations.

Experts from Regulatory Agencies and Industry including companies such as Apotex, AstraZeneca, Global Pharmatech would be participating in the deliberations.

Who is Should Attend :

Persons working in pharmaceutical companies working in Quality control, production, quality assurance, regulatory affairs.
